

## Talks not Submitted to the Proceedings

Irina Ya. Arefeva

*Holographic description of heavy-ions collisions*

Aleksandar Miković

*Regge quantum theory of gravity*

Marko Vojinović

*The cosmological constant problem in the spincube model of quantum gravity*

Goran Djordjević

*"Classicalization" vs quantization of tachyon dynamics*

Branko Dragovich

*p-Adic mathematical physics and its applications*

Sergey Vernov

*Exact and asymptotic solutions for cosmological models with non-minimally coupled scalar fields*

Ekaterina Pozdeeva

*Particle creation multiplicity in modified AdS<sub>5</sub> spaces*

Dimitri Polyakov

*Higher spin gauge theories, background independence and string field theory*

Predrag Jovanović

*Gravitational lensing as a powerful tool in observational cosmology*

Ivan Dimitrijević

*On nonlocal modified gravity with cosmological solutions*

Takeo Kojima

*Vertex operator approach to semi-infinite lattice model*

Voja Radovanović

*Noncommutative SO(2,3) gauge theory and noncommutative gravity*
